KEY WORD INDEX

Absorber effectiveness, 629
Absorption, 83
Absorption heat pump, 207
Absorption heat pumps, 1
Absorption heat transformers, 687
Absorption refrigerators, 629
Acetaldehyde, 289
Agriculture, 431
Air gap, 727
Available energy, 537
Axial dispersion, 75

Backward looking variables, 701
Beau de Rochas cycle, 123
Binary, 127
Binary mixtures, 207
Biogas, 621
Biogas plants, 193
Brayton cycle, 393
Briquetting, 23

Candles, 491
Characteristic time, 411
Charcoal, 103
Chemical, energy storage, 63
China, 589
Cogeneration, 149
Cogeneration systems, 363
Composite climate, 733
Compression-absorption heat pump, 83
Compressors, 327
Conversion devices, 279
Cooling towers, 75
Cooling/heating, 733
CuO/CuO cycle, 63
Cyclical stability of storage systems, 39

Demand profiles, 267
Desalination, 217
Development, 23
Digital control, 167
Displacement power machinery, 393
District heating and cooling, 149
Domestic heating, 673
Doorway, 231
Dry sunlit earth surface, 477
Dual-flashing, 127
Dutch disease, 701
Dynamic analysis, 545

Earth storage, 477
Earth's surface treatment, 605
Earth-air tunnel system, 477
Earth-integrated buildings, 605
Economics, 149, 363
Efficiency, 491
Efficiency improvement, 149
Electricity, 511
Energy, 279
Energy conservation, 137, 167, 267
Energy modelling, 511
Energy policy, 23
Energy storage, 39, 157, 289, 717
Energy system analysis, 511
Energy use patterns, 267
Entropy generated, 537
Estimation method, 207
European community, 511
Evaporation of refrigerant, 45
Exergy, 317
Exergy efficiency, 405

Fixed dome biogas plant, 621
Flat plate collector, 491, 727
Flow in porous medium, 225
Flue gases, 373
Fluorocarbon refrigerants, 1
Forward looking variables, 701
Free convection, 727

Gas machinery, 327
Gas turbine, 149
Gas turbines, 363, 649
Generator effectiveness, 687
Geothermal, 127
Ground heat exchangers, 137
Ground heat storage, 137
Ground-source heat pumps, 503

Heat engines, 393
Heat exchanger effectiveness, 455
Heat pump, 167, 373, 673
Heat pump assisted distillation, 45
Heat pumps, 1, 137, 503
Heat recovery, 373
Heat transfer, 297, 311, 499
Heat transformers, 455, 629, 687
Hierarchy process, 279
High efficiency, 53
Houses, 231

Interzone convection, 231
Inverters, 595
Irreversibilities, 123
Isobaric bubble temperatures, 207

Kinetics, 289
Kinetics of CuO decomposition, 63
Kinetics of CuO oxidation, 63

Latent heat storage, 39
Linear programming, 157
Low Btu fuels, 649
Low Btu gas, 363

Macroeconomic policy responses, 701
Magnetic field, 379
Mass transfer, 311
Melting, 491
Methyl alcohol, 289
Methylene blue-EDTA, 643
Modelling, 157
Moist air, 373
Moulds, 491

Natural gas, 431
NO_x emission, 53, 649

Offshore vessel, 545
Offshore vessels, 573
Opaque wall storage, 717
Optimal control, 317
Optimization, 127

Packed bed, 253
Paraffin wax, 491
Performance, 639
Phase-change, 253
Phase change material, 741
Photogalvanic cells, 643
Photovoltaic power systems, 595
Polar components, 207
Porous medium, 379, 419
Production functions, 123
Profit index, 149
Pulverized-coal fired furnace, 555

Radiation correlations, 589
Radiation heat transfer, 555
Refrigeration, 157
Refrigerator, 167
Refuse-recovered fuel, 363
Refuse-recovered gases, 649
Refuse-recovered low Btu gas, 53
Regenerative gas turbine, 53
Residential energy consumption, 499
Resorption, 83

Salt gradient solar ponds, 527
Second law, 317
Second law analysis, 537
Self-regulating multistage flash unit, 217
SF6 tracer gas, 231
Shading, 727
Simulation model, 363
Simulation models, 649
Sodium lauryl sulphate, 643
Solar air collector, 639
Solar collectors, 317, 405
Solar cooling, 243
Solar energy, 193, 243, 443, 589, 595, 621, 717, 727
Solar passive building, 339
Solar pond, 217

Solar ponds, 527
Solar wall, 443
Sorption-compression heat pump, 83
Spiral ground heat exchangers, 503
Station keeping, 573
Stoves, 103

Temperature sensors, 661
Thermal conductivity, 411
Thermal diffusivity, 411
Thermal inertia, 499
Thermal restoration, 443
Thermal storage, 253, 443, 741
Thermal transients, 443
Thermochemical energy, 289
Thermodynamics, 1
Thermometry, 661
Transience, 225
Transient hot-strip, 411
Trombe wall, 733
Two-phase heat transfer, 45

Unsaturated soil, 297
Unsteady free convection, 379
Unsteady mixed convection, 419

Valves, 327
Vaned diffuser, 639
Vapour compression chiller, 243
Vari-therm wall, 339
Vary-therm wall, 733
Vertical plate, 419

Waste derived fuels, 23
Waste disposal, 53
Wet shaded earth surface, 477
Wind energy costs, 581
Wind energy economics, 581
Wind power, 581
Wood burning stoves, 103
Woods, 103
Working pairs, 207

CONTENTS

Volume 13, Issue Nos 1–6

International Journal of ENERGY RESEARCH

Issue No. 1 JANUARY–FEBRUARY

A Comparative Thermodynamic Study of Fluorocarbon Refrigerant Based Vapour Absorption Heat Pumps: P. D. Dan and S. S. Murthy 1

The Use of Waste Derived Fuels for Energy Supply in Underdeveloped Areas in South Africa: J. G. Petrie and A. A. Eberhard 23

Method of Determination of the Cycle Stability of 'Galisol' Latent Heat Storage Unit Substance Combinations. Its Application to the Investigation of the Glauber Salt Storage Unit: H.-H. Emons, R. Naumann, T. Fanghänel and W. Ahrens. 39

Heat Transfer Coefficients in Horizontal Multi-tubular Evaporators: S. Dodda and A. A. Khan 45

Low No_x Emission Characteristics of Refuse-recovered Low BTU Gases as Fuel for High Efficiency Gas Turbines: P. S. Pak and Y. Suzuki 53

Chemical Energy Storage by the Reaction Cycle CuO/Cu_2O: D. Chadda, J. D. Ford and M. A. Fahim 63

Liquid Axial Dispersion Coefficient in a Packed Cooling Tower: M. A. Younis 75

Sorption-compression Heat Pumps: E. Morawetz 83

Studies on Thermal Performance of Certain Wood Burning Cook Stoves and Design of a High Efficiency Cook Stove: S. Jayaraman, M. S. Bhatt and J. R. Rao 103

SHORT COMMUNICATION

Production Function of a Simple Model Internal Combustion Engine: J. B. Lesourd and A. Sanfeld 123

Issue No. 2 MARCH–APRIL

Binary Dual-Flashing Geothermal Power Plants: H. Shi and E. E. Michaelides. 127

Ground Heat Storage with a Double Layer Heat Exchanger: V. R. Tarnawski 137

Derivation of an Index for Evaluating Economics of Cogeneration Systems and its Applications: P. S. Pak and Y. Suzuki 149

The Use of a Novel Algorithm to Analyse a Sequential Storage Problem in a Refrigeration Plant: A. R. de L. Musgrove and K. J. Stocks 157

Digital Control of Heat Pumps with Minimized Power Consumption: D. Parnitzki. 167

Energy Conservation in Large Air-Conditioned Buildings: Use of Evaporative Roof Cooling in Hot and Dry Climates: M. S. Sodha, R. L. Sawhney and M. K. Deshmukh 179

Solar Assisted Biogas Plants IV: Optimum Area for Blackening and Double Glazing Over a Fixed-Dome Biogas Plant: B. C. Jayashankar, J. Kishor, I. C. Goyal, R. L. Sawhney and M. S. Sodha 193

Empirical Method for Selecting Working Pairs for Sorption Heat Pumps and for Estimating Isobaric Bubble Temperatures: E. Morawetz 207

The Philosophy of Design and Construction of the Kuwait 1700 m^2 Solar Pond: A. A. Al-Homoud, A. Al-Kandari and A. M. Al-Marafie 217

Unsteady Flow of an Incompressible Fluid in a Horizontal Porous Medium with Suction: A. R. Bestman 225

Measurement of Heat and Mass Transfer between the Lower and Upper Floors of a House: S. B. Riffat 231

Performance Analysis of a Solar Vapour Thermal Compression Chiller: C. J. Korres, E. E. Bardakas and N. G. Koumoutsos 243

Issue No. 3 MAY–JUNE

Thermal Response of a Packed Bed of Spheres Containing a Phase-change Material: D. E. Beasley, C. Ramanarayanan and H. Torab 253

Residential Energy and Demand Patterns as Related to Weather and Conservation Measures: F. Y. Sorrell 267

Development of Rank Ordering Techniques Based on the Analytical Hierarchy Process for Evaluation of Energy Conversion Devices: A. A. Girgis, M. A. Wortman and R. Scott Henry 279

Energy Storage using the Reaction Cycle: Methyl Alcohol/Acetaldehyde: M. A. Fahim, T. A. Al-Sahhaf and S. E. M. Haman 289

Heat Transfer Characteristics of an Unsaturated Light Clay Bed Coupled to a Heat Pump: G. B. Reddy and J. C. Mulligan 297

Free Convection Heat and Mass Transfer to Steady Flow in a Semi-infinite Vertical Porous Medium: A. R. Bestman 311

Exergy Optimization of Flow Rates in Flat-plate Solar Collectors: A. K. Kar 317

Displacement Compressors with High Performance Flow Control Valves: R. Decher . . . 327

Solar Passive Building in Delhi: Numerical Simulation and Validation: M. S. Sodha, S. N. Garg, R. L. Sawhney, R. Chandra, N. K. Bansal, A. K. Sharma and V. K. Gupta . 339

Characteristics and Economics of High-efficiency Gas Turbine Cogeneration Systems using Low Btu Gas: P. S. Pak and Y. Suzuki 363

An Open Heat Pump Process for Moist Gases: L.-G. Eklund and S. Ragnarsson 373

Issue No. 4 JULY–AUGUST

Double Diffusive Unsteady Free Convection on Two-dimensional and Axisymmetric Bodies in a Porous Medium: M. Kumari and G. Nath 379

Design Optimization of Porting in a Rotating Sleeve Expander: R. Decher 393

Optimum Exergy Efficiency of Solar Collectors: A. K. Kar and M. Shaahid 405

Temperature Dependence of Thermal Conductivities and Thermal Diffusivities of Composites Using Transient Hot-Strip Method: N. S. Saxena, S. E. Gustafsson, M. A. Chohan and A. Maqsood. 411

Doubly Diffusive Unsteady Mixed Convection Flow Over a Vertical Plate Embedded in a Porous Medium: M. Kumari and G. Nath. 419

Natural Gas Demand by Agriculture in the USA: N. D. Uri 431

Thermal Restoration of a Wall After the Interruption of Solar Radiation Flux: G. Athanassouli 443

Influence of Heat Exchanger Effectiveness on Performance of Vapour Absorption Heat Transformers: J. M. George and S. S. Murthy 455

Performance of Earth–Air Tunnel System for Different Earth Surface Treatments: M. S. Sodha, R. L. Sawhney and A. K. Sharma 477

SHORT COMMUNICATIONS

Melting of Wax by Solar Energy Based on One Shift: P. B. L. Chaurasia and J. P. Gupta 491

Mass Effects in Residential Energy Consumption: M. C. Potter 499

Issue No. 5 SEPTEMBER–OCTOBER

Performance of a Spiral Ground Heat Exchanger for Heat Pump Application: O. J. Svec and J. H. L. Palmer 503

Intertemporal-Spatial Equilibrium, Demand and Substitution of Electricity in the EEC from 1953 to 1986: B. E. Apostolakis 511

The Process of Loss of Internal Stability in Salt Gradient Solar Ponds: P. T. Tsilingiris and L. B. Mullett 527

Second Law Optimization of Convective Heat Transfer Through a Duct with Constant Heat Flux: P. K. Nag and N. Kumar 537

Computation of Environmental Forces for Use in Offshore Vessel Dynamic Analysis: K. A. Ansari and N. U. Khan 545

Effects of Particulate Concentrations on Temperature and Heat Flux Distributions in a Pulverized-Coal Fired Furnace: K. R. Varma and M. P. Mengüç 555

Effect of Vessel Hydrodynamic Mass on the Station-Keeping Response of a Moored Offshore Vessel: K. A. Ansari 573

Economic Analysis of Wind-Generated Electricity in Remote Areas of South Africa: R. Diab and B. O'Leary. 581

General Correlations for Estimating the Monthly Total and Direct Radiation Incident on Horizontal Surfaces in Yunnan, China: L. Wenxian 589

Load Independent Efficient, Transformerless Inverter for Photovoltaic Applications: N. A. Al-Rawi, M. M. Al-Kaisi and A. K. Hassan 595

Effect of Different Surface Treatments of the Surrounding Earth on Thermal Performance of Earth-Integrated Buildings: B. C. Jayashankar, R. L. Sawhney and M. S. Sodha . . 605

SHORT COMMUNICATIONS

Solar Assisted Biogas Plants IVA: Experimental Validation of a Numerical Model for Slurry Temperature in a Glazed Fixed-Dome Biogas Plant: M. S. Sodha, I. C. Goyal, J. Kishor, B. C. Jayashankar and M. Dayal 621

CONFERENCE DIARY 627

Issue No. 6 NOVEMBER–DECEMBER

Influence of Absorber Effectiveness on Performance of Vapour Absorption Heat Transformers: J. M. George and S. S. Murthy 629

Improvement in Solar Air Collector Performance with Vaned Diffuser: J. Naga Raju and A. Thomas 639

Use of Sodium Lauryl Sulphate in a Photogalvanic Cell for Solar Energy Conversion and Storage: Methylene Blue-Edta System: S. C. Ameta, S. Khamesra, A. K. Chittora and K. M. Gangotri 643

Evaluation of Thermal No_x Emission Characteristics of High Efficiency Gas Turbines using Refuse-Recovered Low Btu Gases: P. S. Pak and Y. Suzuki 649

Testing of Industrial Temperature Sensors in Liquids: R. K. Chohan 661

Assessment of a Domestic Heat Pump I: The House/Heat-Pump Interaction: C. G. Carrington and I. R. Cox-Smith 673

Influence of Generator Effectiveness on Performance of Vapour Absorption Heat Transformers: J. M. George and S. S. Murthy 687

The Economic Effects of a Natural Resource Discovery: a Theoretical and Simulation Exercise: C. Harvie 701

Evaluation of the Ability of an Opaque Wall to Store and Exploit Solar Radiation: G. Athanassouli 717

Studies on Gap Spacing Between Absorber and Cover Glazing in Flat Plate Solar Collectors: N. M. Nahar and J. P. Gupta 727

Vary-Therm Wall for Cooling/Heating of Buildings in Composite Climate: A. K. Sharma, N. K. Bansal, M. S. Sodha and V. Gupta 733

SHORT COMMUNICATION

The Heat Storage Potential of Ethylenediammonium Ditetramethoxyborate: K. Stringer, J. W. Wilson and R. Morgan 741
